[dkbhaikar@gmail.com](mailto:dkbhaikar@gmail.com) | [+91 90192 00608](tel:+919019200608) | Hassan, Karnataka, India

## OBJECTIVE

Undergraduate student pursuing a B.E. in Artificial Intelligence and Machine Learning, seeking an internship/entry-level role to apply hands-on experience in full-stack development, computer vision, and AI-integrated systems. Proven ability to independently design, build, and deploy end-to-end software solutions, backed by freelance client work and active participation in technical clubs and hackathons.

## EDUCATION

2024 – 2028 **Bachelor of Engineering – Artificial Intelligence and Machine Learning**  
**Malnad College of Engineering, Hassan, Karnataka** *(Ongoing)*

## TECHNICAL SKILLS

|                   |                                                                                                             |
|-------------------|-------------------------------------------------------------------------------------------------------------|
| Languages         | Python, C, Java (Basics)                                                                                    |
| Web Development   | HTML, CSS, JavaScript, Node.js, Express.js, React.js, Next.js, Tailwind CSS, Bootstrap, Three.js, REST APIs |
| Databases & Cloud | MongoDB, MongoDB Atlas, MySQL, Firebase                                                                     |
| AI & Automation   | RAG (Retrieval-Augmented Generation), MCP (Model Context Protocol), n8n Workflow Automation                 |
| DevOps & Tools    | Docker, GitHub, Vercel, Render, Postman                                                                     |
| Dev Environments  | VS Code, Cursor, Replit, Claude Code, Codex, Windsurf, Antigravity                                          |
| Design Tools      | Canva, Figma, Google Stitch, P5.js Editor, Hatch XR                                                         |
| Other             | Security & Networking Fundamentals — OS: Windows, Linux                                                     |

## PROJECTS

**Sentinel AI – Intelligent Monitoring and Assistance System** *MERN Stack, MongoDB, REST APIs, AI/ML*

- Developed a context-aware API firewall using Node.js/Express with request inspection, IP-based behavioral analysis, endpoint sensitivity scoring, and SQLi/XSS/brute-force detection.
- Implemented a real-time decision engine with risk scoring, progressive blocking, and behavioral detection of attack patterns such as brute-force attempts and endpoint scanning.
- Built a security dashboard for live request monitoring, attack distribution, endpoint risk analysis, and AI-generated threat explanations using Grok/Claude.

**Hand Gesture Cursor Control System** *Python, OpenCV, MediaPipe, PyAutoGUI*

- Developed a real-time hand gesture-based cursor control system using computer vision techniques.
- Implemented gesture recognition with MediaPipe hand landmark detection, enabling cursor movement, clicks, scrolling, drag-and-drop, and zoom operations.
- Designed a touchless, accessible human-computer interaction system using a standard webcam, eliminating the need for specialized hardware.

## EXPERIENCE

**Technical Student Member – DevOps Club** *Malnad College of Engineering*

- Managed and contributed to technical projects, software solutions, and college-based development initiatives.
- Developed a client-facing website for a software company as part of club technical activities, delivering the project on schedule.
- Implemented the Cicada event application using Firebase services and real-time database functionality to manage event activities.
- Supported and coordinated the technical execution of workshops, hackathons, and technical events.

**Freelance Software Developer – Independent Contractor** *Remote, 4+ Clients*

- Delivered 4+ client websites end-to-end across diverse industries, including digital printing, business consulting, and technology.
- Built a full-stack website with a custom admin panel, enabling non-technical staff to independently manage content; continue to handle ongoing maintenance and support.
- Managed the complete project lifecycle – client requirements, design, deployment, and post-launch updates – working independently.

## ACHIEVEMENTS

- **2nd Place – Cybersecurity Hackathon, Rajeev Institute of Technology:** Developed an innovative **Sentinel AI**-driven cybersecurity solution in a competitive team environment, recognized for technical excellence.
